

Figure 1

Figure 1 consists of two panels, (a) and (b), showing the evolution of the number of nodes (N) over time (t). Panel (a) shows the evolution of the number of nodes in the network, which starts at approximately 100 and increases rapidly, reaching a plateau around 1000 after about 100 time steps. The curve is smooth and follows a sigmoidal shape. Panel (b) shows the evolution of the number of nodes in the network, which starts at approximately 100 and increases rapidly, reaching a plateau around 1000 after about 100 time steps. The curve is smooth and follows a sigmoidal shape.
